PROFESSIONAL SUMMARY

Experienced **Java Backend Developer** with 3+ years in building **scalable microservices** and **RESTful APIs** using **Spring Boot** and **Spring Security**. Skilled in **payment gateway integrations** (Razorpay, CCAVENUE), **webhook handling**, and implementing **JWT-based security with RBAC**. Strong problem-solver with a focus on clean code, **backend performance**, and Agile delivery.

WORK EXPERIENCE

Java Developer

Smartbox Lockers(Payroll administrated by FCI)

10/2022 – Present

Noida, India

- Developed scalable microservices for logistics, locker management, and payments using **Spring Boot** and **REST APIs**.
- Integrated Razorpay, Paytm, and PhonePe gateways via **Factory Pattern**, handling UPI, card payments, refunds, and partial refunds.
- Designed secure payment pages and implemented webhook consumers with **dual verification** for enhanced security and data integrity.
- Secured APIs with **Spring Security + JWT**, enabling RBAC for admin, user, and partner roles.
- Diagnosed and resolved live production issues.
- Worked in Agile teams, contributing to sprint planning, performance tuning, and CI/CD improvements.

Java Developer Jr

Scoreme Solutions Private limited

02/2022 – 10/2022

Gurgaon (Haryana),
India

- Built APIs for bank statement analysis by extracting structured data from PDF documents using Apache PDFBox.
- Engineered backend logic for loan and income analysis based on transaction behavior.
- Optimized backend latency by 30% using query tuning and basic caching.

EDUCATION

• Bachelor of Science (B.Sc .) in Information Technology:

University of Mumbai — 2018 – 2021 | **CGPA: 8.20**

• 12th (HSC), Science Stream:

Uttar Pradesh State Board, **84.4%**

• 10th (SSC) ,Science Stream:

Uttar Pradesh State Board, **84.0%**

SKILLS

Technical Skills

- **Languages & Core Java:** Java (SE/EE), OOPs, Collections, Multithreading
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Security, Hibernate, Spring Data JPA.
- **Microservices & APIs:** RESTful Web Services, Microservices Architecture
- **Databases:** MySQL, MongoDB
- **Integrations:** Payment Gateway Integration (CCAvenue, Razorpay,Stripe)

Backend Development Projects

• Payment Gateway Integration

Tech Stack: Java, Spring Boot, Spring Security, Razorpay, Paytm, JWT. Developed a secure, modular payment module using the **Factory Pattern**, integrating Razorpay, CCAVENUE. **webhook verification** for fraud prevention.

• Bank Statement Analyzer

Tech Stack: Java, Apache PDFBox, Spring Boot, MySQL Enabled **loan eligibility** and **income classification**, optimizing backend response time by **30%**.
